

# How to Bake Perfect Eggs by Food Storage Moms

## Ingredients:

- 1-12 eggs directly from the cold refrigerator. No need to have them at room temperature.
- Fill the muffin cups with 1/4-1/2-inch water for each egg
- Place the desired amount of eggs in the muffin pan

## Instructions:

1. Place the Sun Oven in direct sun and preheat to 350 degrees. Bake @ 350 degrees in Sun Oven for 40 minutes. Remove the muffin tin from the oven and run the eggs under cold to remove shells. Refrigerate the eggs.
2. Preheat conventional oven to 350 degrees. Bake @ 350 degrees in the conventional oven for 30 minutes. Remove the muffin tin from the oven and run the eggs under cold to remove shells. Refrigerate the eggs.
